

JOB ADVERT

A permanent **Project Engineer / Senior Engineer** role, based in the **Southwest**.

We are looking to hire a **Project Engineer / Senior Engineer** to join our Long-Term Projects Business Unit. You will be responsible for producing all technical solutions, designs and engineering of all onsite lifting operations, receiving transportation, loadouts, marine transportation and load-ins.

The successful candidate will have an experience in the engineering of hydraulic gantry installations and crane lifting projects. Other role aspects may include the engineering and planning of transportation projects (using SPMT and modular conventional), barge loadouts and load-ins, jack and skid installations.

Your new company

Osprey is a great, British, logistics provider. Drawing on 25 years of in-house experience, our people find the right approach, the right combination of expertise and equipment and the safest, most efficient way to transport and install their assets and critical infrastructure. We've shaped our business with family values, and we concentrate on building long-term relationships. We're independent. We may be the strongest UK company you've never heard of.

We transport and install the largest structures and critical assets needed to build and renew major infrastructure. Everything from a new 4,000te railway bridge, to the world's largest offshore windfarm blade – at 107m long. With a maritime, vessel-owning heritage to be proud of, we own our own heavy cargo barges; we have one of the largest domestic SPMT fleets in the UK and some of the heaviest lift cranes. We're committed to delivering on our promises. On time, on budget.

Your new role

You will work as part of the team within the Nuclear Business Unit to deliver turnkey logistics solutions to Osprey's clients throughout the UK and Europe.

As **Project Engineer / Senior Engineer** you will be accountable for:

- Using their expertise to devise smart engineering solutions for heavy lifting and transportation projects.
- Conducting site visits and providing conceptual solutions for lifting operations.
- Preparing and selecting both existing and renewed engineering statements.
- Developing drawings, calculations, visualisations, manuals, risk assessments and other key documents.
- Ensuring efficient execution that delivers the right results for the customer with particular focus on safety and quality.
- Ensuring high levels of document quality and document control throughout the lifecycle of the project.
- Attending site visits to assess customer requirements, along with attendance during operations to manage and motivate the team. Acting as a point of contact for the customer and site operation teams.

What you'll need to succeed

The successful candidate will have:

- Bachelor's degree in an engineering-related discipline or demonstrable industry experience
- Experience in managing a project
- Relevant experience in temporary works design, structural design and analysis, problem solving from first principles
- Ability to produce well-structured design calculations and reports
- Proven experience of acting as an engineer with a direct customer interface
- Relevant experience in heavy lift transport, shipping or lifting markets, with evidence of delivering targets and achieving objectives

- Experience with SPMT equipment in all configurations, road transportation in all configurations and RoRo operations
- Ability to invent and propose new methods of work/modifications to existing systems
- Ability to solve ad hoc problems quickly with clearly defined solutions

It is desirable, but not essential that you have the following:

- Master's degree in an engineering-related discipline, IOSH Working Safely/IOSH Managing Safely, CSCS Safety Passport, CSCS Appointed Person, proven experience in developing and delivering engineering solutions in the heavy lift industry.

What you'll get in return

A competitive salary plus excellent benefits. We are offering a salary of between £40,000 and £70,000 gross per annum – depending on experience. The role offers an opportunity to join an organisation committed to supporting its employees.

In addition to your basic salary, you will receive the following benefits:

- 25 days' annual leave, plus 8 bank holidays
- Enhanced employer pension contributions
- Private medical insurance
- Income protection insurance
- Performance-related pay scheme
- Flexible/hybrid working environment
- Access to our Employee Assistance Programme
- Support with your career development through our Success Management Process

Osprey is committed to being an inclusive employer and strives to attract talent who thrive in an inclusive and flexible working environment.

If you have a disability or need any reasonable adjustments during the application and selection stages, please let us know and we will respond in a way that best fits your specific needs.
